Skills

Data Analysis & Visualization

- Power BI (Interactive Dashboards, Data Modeling, DAX)
- Exploratory Data Analysis (EDA)
- Data Storytelling & Insight Generation

Programming

- Python (Pandas, NumPy, Matplotlib, Seaborn, Scikit learn, Pytorch)
- SQL (Database Queries & Data Manipulation)
- Java (Object-Oriented Programming)
- C# (OOP & Application Development)

Concepts & Tools

- Data Cleaning, Statistical Analysis & Preprocessing
- Machine Learning
- Basic Deep Learning

Projects

• Interactive Power BI Dashboards — Data Visualization Project

- Designed professional **and interactive dashboards** using Power BI for business insights and analytics competitions.
- Implemented advanced DAX measures, KPIs, and filtering features to enhance user experience.
- Applied data modeling techniques to improve reporting efficiency and visualization clarity.
- Successfully merged analytical skills with design expertise to communicate insights effectively.

• Movie Recommendation System — Machine Learning Project

- Built a personalized movie recommendation system using similarity-based algorithms.
- Processed and analyzed movie datasets to identify user preferences and recommendation patterns..
- Demonstrated strong understanding of recommendation systems and user-focused data analysis.

• Anime Face Generation using DCGAN — AI Project

- Developed a **Deep Convolutional GAN** capable of generating unique anime face images.
- Designed a Flask-based web interface to allow real-time image generation.
- Strengthened knowledge of neural networks, deep learning, and model training techniques.

• Exploratory Data Analysis Projects

- Conducted multiple data analysis projects involving **cleaning, transformation, and visualization** of datasets.
- Identified patterns, trends, and key insights through structured analysis.
- Communicated findings **using visual dashboards** and reports.
